Coleshill Interchange

Community Update – September 2025

PROLOGIS®

Dear Stakeholder,

We're writing to inform you that Prologis are bringing forward plans for an exemplary advanced manufacturing and logistics-led development at Coleshill Interchange at Junction 4 of the M6.

With decades of experience creating places for businesses to grow and thrive, Prologis is proud to be a dedicated investment partner here in the West Midlands. As the world's leading investor, developer and long-term owner of modern, sustainable logistics spaces, we are committed to supporting local communities and helping the region grow.

Coleshill Interchange will support economic growth, inward investment and bring not just jobs but also training and education opportunities to North Warwickshire. Prologis will be providing onsite training for local schools and the community through Prologis' Warehouse Logistics Training Programme. Our proposals will look to address the critical need for well-connected buildings and infrastructure that drives investment, supports local communities and delivers sustainable development at the heart of the West Midlands' transport network.

Prologis would like to invite your feedback on the emerging proposals and answer questions you may have, and will be hosting a public event in order to inform the community about the plans for the site. Details of this event are below, as well as a link to a project website where you can learn more about the proposals. If you have any further questions about the proposals, please don't hesitate to contact the team via the contact details below.

Event details

2 October 2025
15:30 – 19:30

Coleshill Hotel
Coleshill High Street
West Midlands B46 3BG
