

Protect your car with a free Faraday pouch

Keyless entry seems like a great idea, in principle – having to juggle five bags and a car key after dropping by the shop on the way home was never the dream.

However, it makes stealing your car a lot easier – clever devices called “Relays” can detect and copy the signal from your keyless fob remotely, meaning a car thief can jump into your car and drive off with minimal effort.

The quick and easy way to stop this is to keep your keyless fob in a Faraday pouch.

These clever wallets stop the signal completely, meaning your key only talks to your car when you take it out, and doesn’t end up accidentally giving your car away to a passing reprobate.

We have a number of these Faraday pouches free and ready to go – fill in our form linked below, and we’ll get one over to you.
